Endorsements from Quoting

Odyssey now supports endorsements at Quote level. Users (optionally including external brokers) are able to process endorsement quotes manually or via their broking system. This allows pre-population of the quote with the parent loan details. The user can add the policy details for the endorsement (or have them transferred from the broking system). Documentation can be produced outlining previous and future repayment amounts. The endorsement quote can then be imported into an endorsement batch for approval. This enhancement takes a lot of the manual work out of the endorsement process and allows your brokers to do some of the work for you.

I-Fund – Red Planet goes Mobile

As well as sending SMS's to mobiles to alert clients of overdue payments, we have opened this up to a whole world of additional functionality. In the text message we can include a link so the client can access their account

details and (optionally) make the payment of the overdue amount by credit card (A mobile that supports Internet browsing is required). There are a lot of possibilities (and associated security issues) with this technology, so feel free to give us a call to chat about your particular requirements.

Red Planet brings you the News

Completely separate to the world of Premium Funding, Red Planet has developed a series of News portal web sites to bring local, national and international news to local communities. These sites combine stories sourced from local reporters with news feeds from the likes of ABC, AP and AAP. Take a look at www.toowoombanews.com.au as an example. If you have a requirement for development outside our normal line of work (i.e. Ironbark or Odyssey), please talk to us and we will come up with a creative solution for your business.

We appreciate hearing from our clients so if you have any feedback or ideas to build on these enhancements, please email peterw@redplanetsoftware.com.
